

# TOGO

**JOINED 50-IN-5  
NOVEMBER 2023**

First-Mover Country

“

Having developed DPI in house, we have a role to play in regards to expanding DPI on the continent – starting in West Africa first – and that’s why we want our payment platform Novissi to be open source because we believe we have a role to play to contribute to our progress as a country and as a continent.

—  
**Cina Lawson**  
Minister of Digital Economy and Transformation, Togo

“

We’re excited about 50-in-5 because it highlights the innovation taking place in Africa, and provides a platform to share our own experiences and technology with the world.

—  
**Kô Goma**  
Strategic Advisor to Minister Cina Lawson

## CURRENT DPI FOCUS

### DIGITAL IDENTITY IMPLEMENTING

Togo is implementing a foundational e-ID based on the digital public good MOSIP, with efforts to enroll the entire population currently underway.

### DATA EXCHANGE SYSTEMS

PILOTING

### DIGITAL PAYMENTS

#### PLANNING AND MAINTAINING

Novissi, a digital cash transfer platform that provides secure and efficient financial assistance to vulnerable populations, plays a key role in social protection programs throughout Togo. There is a process underway to have the platform become a digital public good.

## COUNTRY COOPERATION

Collaborating with Estonia on data exchange systems and India for digital ID implementation.

## DIGITAL PUBLIC GOOD SPOTLIGHT

Togo is using multiple digital public goods as part of their DPI efforts.

#### OPENCRVS

An open-source civil registration system used for issuing birth certificates, ensuring that every birth is recorded accurately and efficiently.

#### SUNBIRD RC

A platform for creating electronic registries and managing verifiable credentials, enhancing the reliability and accessibility of digital records.

#### OPENG2P AND MOJALOOP

Digital payment platforms designed for efficient disbursement of social benefits, enabling secure and seamless financial transactions for beneficiaries.
